“ Paul & Collin - I was deeply saddened to hear of mom's passing. But, I want to focus on some of the fond memories of her. Paul and I have basically been best friends since the 4th grade and I spent lots of time as a kid and teenager at the Wooding household. Janet was one of the most interesting women I've ever met. Perhaps the most amazing thing to me was her love for cars and racing. As a kid I was amazed to find out that your mother used to race cars. But, not only raced them - built and maintained them too! When you think of it, she was basically a racing pioneer; there were not many woman racing back in here day — both road racing and drag racing. And, all of the animals — hahaha, I used to love going there with all of the animals. I could go on and on. Lots of fond memories. She will be greatly missed, and most certainly, never forgotten. Love you guys!
