“ *John:*

I remember Linda as a lovely woman, quiet and retiring but one of the best engineers I met at LM. There are no words to convey our sadness for your loss.

“ I remember Linda and the family creating fabulous chalk art in the street at our neighborhood block parties. At our last block party, she jumped right in to help create a wonderful greeting card for our neighbor Liesl with all the neighbors posing behind it. We will certainly miss her!

“ John - It is terrible to hear about your loss and I express my sincere sympathy to you and your family. Our team worked with Linda a brief period when she helped us to define the requirements for MMSP/BMD 4.0.1 Adaptation Data. We all were impressed with her technical expertise, thoroughness, helpfulness, and professionalism and we were able to get our work done on time because of her. Our thoughts and prayers are with you and your family during this difficult time. Nghia Nguyen

“ John - Please accept my deepest condolences. This is such sad news. I was fortunate to work with Linda for 30 years. She always focused on knowledge and let that guide her work. That is a lesson I try to follow everyday. Most of my interaction with Linda was work related, however, on one occasion we spent a few weeks together on business travel in Hawaii. Settings like this let you see a more personal side of people. Linda helped me pick out a necklace for my wife. That piece of jewelry was one of my wife's favorites. If we measure a person's life by the impact that have on others, Linda's was a huge success.
